WORLD HAPPENINGS BRIEFLY TOLD

Suffrage has been granted women of the Philippines, marking the first extension of the right to vote to the women of an Oriental country.

The Nobel committee of the Norwegian storting (parliament), decided not to award the Nobel peace prize this year.

Right of chiropractic and similar bodies to practice in hospitals was thrown out of discussion at the British Columbia Hospitals' Association Convention at Victoria, B.C.

Three famous explorers, Sir Hubert Wilkins, Lincoln Ellsworth and Bert Halden were reunited at Dunedin, New Zealand, when their supply ship "Wyatt Earp" arrived from Norway.

Cold shipments approximating 40,000 were recently flown by aeroplane from the interior sections of Alaska to Seward to connect with the outgoing steamer.

On the opening of "Good Book Week" in Portland, Oregon, Mrs. H. Bittles reported to police that a thief who broke into her apartment stole a \$42 dictionary.

A considerable decrease in the number of assignments under the Bankruptcy and Winding Up Act, 1934, reported to the Dominion Bureau of Statistics, was recorded in September, as compared with September, 1932.

Following its recent condemnation of the old Chinese alkaline because it was based on superstition, the government has ordered the wholesale destruction of lunar calendars and substitution of modern ones.

Colonel Charles A. Lindbergh said he is thinking of making an exploration tour across the Atlantic Ocean by the southern route, similar to his recent stage-by-stage flight of the north Atlantic, and has no thought of a non-stop flight.

The Evening News of India said that eggs were hurled at a platform on which M. K. Gandhi was speaking, was seized during a public meeting at Nagpur. The incident was regarded as the first of its kind in Gandhi's public life.

Honor Horses Of History

Many Countries Represented On Panels In Plaza in Toronto

Fourteen incidents in which horses played an important part in history are depicted in as many panels painted by the widely known Irish artist, John Keating, for the Plaza in Dublin, where the drawing for prizes for the Irish sweepstakes is held.

Paul Revere's ride is the subject for the section from United States history—one of the first and not the least important of incidents in the American War of Independence. Napoleon's horse, "Marengo," is seen in another of the panels. It was captured in 1796 by a French soldier during a battle with the Turks in Egypt. The animal carried Napoleon from that time on until it was wounded at Waterloo.

Canada is represented by the Royal Canadian Mounted Police; Enrichment by Dick Turpin and Black Bess; Spain by Don Quixote and Rosinante; England by Lady Godiva; Belgium by Roland's ride from Chartres to Ales; and Ireland by Eminent Macha—a race horse famous in English history in which a woman matched speed with a horse.

SIMPLY WON'T YOU?

Take Lydia E. Pinkham's Vegetable Compound

Can anything be more reassuring for women than the Canadian doctor's statement that you have been given a safe, reliable, and effective remedy for all your troubles? This comes in a simple, pleasant, and effective form—Lydia E. Pinkham's Vegetable Compound.

Lydia E. Pinkham's Vegetable Compound will help you. Its tonic action will give you renewed strength. It will help you feel that you are doing your best. It will help you feel that you are doing your best. It will help you feel that you are doing your best.

Clever Gaffer Is Slightless

Legless Caddy Leads Blind War Veterans And Directs Putts

Since J. A. McGowan, long-land, returned from the war, totally blind, he has been playing golf. And he can make a perfect 160 yard drive and putt with amazing accuracy.

The slightless golfer perfects his game by tireless devotion. At every hour of the day he was out on the course practicing, with the aid of his caddy, until he had perfected the system which overcomes his handicap.

The caddy has lost both his legs. He not only followed Aitken's drives and leads the golfer to them but is an invaluable aid in putting. He taps the metal casing of the hole and, guided by the sound, Aitken makes his putts.

Started On Tower Hill

Premier Ramsey MacDonald Began Career In Historic Quarter

Many distinguished careers have abruptly ended tragically on Tower Hill, but Prime Minister Ramsey MacDonald seems to have been the only one who began his career in this historic quarter. In "Pageant of Tower Hill," published and written by Rev. "Tubby" Clayton, padre of the St. Clement, and E. B. Leitch, Customs House librarian, it is revealed Mr. MacDonald started on Tower Hill as a warehouse clerk in 1887 at a weekly wage of about \$3.

Pickles Pay Tuition Fees

Miss Doris Alsop, of Port Worth, Texas, literally has pickled and preserved her way through two years of college work at Texas Woman's College here. The enterprising student this year put up 831 cans of food-stuffs, 104 of them cucumber pickles, which she sold to pay her way through the school year.

Recipes For This Week

(By Betty Barclay)

THREE IN ONE RECIPE

(Bran Muffins, Waffles and Griddle Cakes)

1 cup shortening.

1 cup sugar.

3 eggs (well beaten).

1 cup sour milk.

1 cup bran.

2 cups flour.

2 teaspoons baking powder.

1 teaspoon salt.

Cream shortening and sugar. Add eggs, sour milk and bran and let soak until most of moisture is taken up.

Sift flour with baking powder, salt and sugar and add to first mixture—stirring only until four disappears.

Bake in greased muffin tins in a moderate oven (400 degrees Fahrenheit) for 20 to 25 minutes or in a hot waffle-iron. Some of the mixture may be thinned with water or milk and used for griddle cakes.

Yield: 16 small muffins, 3 waffles or 8 griddle cakes.

STUFFED FLANK STEAK

Here a flank steak trimmed and scored; that is, cut all over the surface in cross-criss lines. Mix together one cup bread crumbs; one small onion, chopped; one-half cup grated raw carrot; one-half cup finely diced celery; one tablespoon minced parsley; one teaspoon sugar; salt and pepper to taste, and one-third cup hot water or enough to moisten. Spread the mixture over the flank steak. Roll up as tightly as possible. The firmly and sprinkle with flour, pepper and salt. Brown quickly in hot fat. Then place in a covered pan and bake in a moderate oven for one and one-half hours. Boast two or three times during the cooking with two tablespoons butter melted in one-third cup boiling water. When done, remove the strings. Serve with brown gravy made from the fat in the pan.

The display of the aurora borealis is ordinarily high in the heavens, more than 50 miles above the earth's surface.

Germany may have a whaling fleet.

SUNDAY SCHOOL LESSON

NOVEMBER 20

PAUL IN CORINTH

Golden Text: "I determined not to know anything among you, save Jesus Christ, and Him crucified."—1 Corinthians 2:2.

Lesson: Acts 18:1-18; 1 Corinthians 1:1-28.

Devotional Reading: 1 Corinthians 13.

Explanations and Comments

Paul's Exhortation To Unity, 1 Cor. 1:10-18.—In Paul's first letter to the Corinthians after his exhortation of incorporation and by-laws so as to make possible the holding of the fair in 1934.

It is expected that many new exhibits and concessions will feature next summer's fair. Several foreign countries which have not been officially represented with exhibits at this year's fair are expected to be represented in 1934. It is said that Russia may have an exhibit, provided diplomatic relations between this country and the soviet republic are established by then.

The more expensive exhibits, such as the diamond display and the pearl exhibits in the Japanese pavilion as well as the exhibits of delicate scientific instruments, will be kept over the winter in Chicago storage houses.

It is expected that the buildings on the fair grounds will be kept open until Christmas for the transaction of business. After that they will be boarded up until the opening of the fair in 1934.

Gave Smuggler Away

Squalling Of Pigs Meant Punishment For Irishman

Smuggling of live stock from the Irish Free State into Northern Ireland and to the new high tariff duties was dampened when the sad tale of one smuggler became known recently. A Northern Ireland farmer on his way home hid some Free State pigs in his truck. When stopped at the border he kept the engine running from the grunts of his passengers. Suddenly the engine stopped and the pigs squealed. The customs officers seized the truck and its load, and the amateur smuggler had to walk home penniless.

A Giant Apple

An apple a day keeps the doctor away, but here is a sample worth keeping two or three doctors away. This apple, grown on a tree in the garden of Ernest Dwyer of Pointe Claire, is fourteen inches in circumference, tips the scales to one and a half pounds and sports a deep scarlet complexion.

A room full of typists at work is equivalent in noise to an auto horn heard 20 feet away, has been determined in England.

Some say that the depression has been a good thing and that great towels have even been put to work.

Woman's Weakness

The best remedy for the weakness of the female sex is a course of treatment with the famous "Woman's Weakness" pills. These pills are made of the finest ingredients and are guaranteed to cure all cases of female weakness. They are sold in every drug store and are highly recommended by the medical profession.

Scientists Are Making Good Headway In Solving The Secrets Of The Ocean's Depths

From seas which pirates sailed for centuries in search of Spanish gold the yacht "Caroline" recently returned to Washington with new treasure found in the ocean's depths.

This new treasure comes from attempts to answer the question, "How deep is the ocean?" as well as, "What is in the ocean depths?" The answers, so far, are incomplete. But that revealing contributions have been made to the store of human knowledge is certain. Still, the survey from the "Caroline," which includes studies in the physics, chemistry and marine and plant life of the waters north of Puerto Rico, covering an area extending from Santo Domingo to the Virgin Islands, has only begun.

Under the direction of Dr. Paul Barthelemy of the Smithsonian Institution, the exploration, pursued for two months has been made possible by the joint effort of a group of scientists and the co-operation of Ellbridge Reeves Johnson, who contributed the use of his yacht and financed the assembling and installation in it of special equipment and instruments.

This winter's exploration was in reality in the nature of a sampling expedition. Primarily it was made for the purpose of determining what detailed survey was needed for a scientific survey which is to continue through four winters. Actually much more was accomplished. The Caroline gathered many specimens of deep-sea plant and animal life.

The region just north of Puerto Rico is interesting for one reason, among others: it is the southern part of the Atlantic. Depths in excess of five miles have been found (the greatest one, the Blake Deep, being 5,200 feet), and the bottom near by may be discovered. Modern electric sounding equipment by means of which waves of sound are sent into the deep to be echoed back from the bottom and automatically recorded was lent by the navy to check old records or establish new ones.

A single boom, such as might have been seen on a freighter, mounted on the quarterdeck was used for the only indication that the "Caroline" might be on some special mission. But inside there was a specially designed sounding equipment, but instruments for measuring water temperature at different levels; for detecting trends of currents and analyzing the water itself.

Steel cables bearing fishing lines miles long. There were also nets and bait of colored electric lights to lure the luminous denizens of the deep seas with head and tail lights. Much as bait is attracted from the hook by a bass, huge nets, twenty-five feet across, or traps of heavy pipe and wire-mesh construction, were used to haul the steel fishing lines a thousand feet or more below the surface of the Atlantic.

One of the most important results of the winter's cruise was the successful testing of new methods of underwater photography. Two specially designed cameras proved their worth. One was effective 100 feet below the surface, while the other was used at depths down to 1,500 feet.

At times the open deck of the "Caroline" which adjoins the laboratory was covered with thousands of brilliantly colored creatures of the deep sea, unwilling travelers to a new world of light and air. Here, where there was ample light, M. E. Chevalier, the artist, painted fervently to catch the quickly changing hues of some specimen previously not seen by man.

One Qualification

There was in the middle of her singing lesson when her mother arrived in the room. After listening for some time she broke in:

"Ah—er—how is my daughter getting on? Do you think she will eventually make a great singer?"

"The music teacher seemed at a loss for words."

"Well, dadman," he said at last.

"It's rather difficult to say."

"But you must know by now if she possesses some of the qualifications," said the girl's mother, sharply.

"Well, she's got a mouth," replied the teacher.—London Answers.

In one English town traffic lights are painted by running a specially equipped motorcar over the road and allowing a canvas covered wheel to leave a white trail.

In Memory Of Hinkler

Synbol Erected On Alps 5,000 Feet Above Sea Level

The late Bert Hinkler, great Australian air ace and squadron leader in the British Air Force, will be a symbol for all fliers from Brazil to the East.

The Aero Club of Arizona has erected to his memory a fine column of white limestone, standing 5,000 feet above sea level, on the Tucson Alps, near the spot where he crashed last January during one of those furious storms which frequently assail the highlands.

He had left London and was heading for Sydney, Australia. Nothing was heard of him from the morning of his departure from the British capital until four months later in May, when a shepherd going up the Alps near Florence crossed the pass near Campo Maggiore, and saw wreckage sticking out of the partly melted snows.

Beneath lay Bert Hinkler's body and the remains of his aeroplane. His diary showed that he had had stormy weather and was trying to cross Italy to reach Brazil before his next job to Persia. He must have lost his way in the storm and crashed on a mountain side.

The memorial is a remarkable landmark, and in clear weather can be seen for miles around.

NEW SLIP FOR THE NEW SLIM-LINE SILHOUETTE—AND IT'S SO EASY TO MAKE

Slim lines? Yes, there are slim-lines a plenty in the newest fall fashions.

You'll be wanting the new costume piece. Today's model is especially designed for the new frocks.

It's easy to make! Cut it out and run it up on the sewing machine in an hour or so. Two parts to the pattern. Finish the upper edge with bias. Roll the lower edge by hand.

You'll be surprised at how little it costs to make it.

Choose crepe silk or crepe satin.

Style No. 513 is designed for sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust.

Size 14 requires 2½ yards 36-inch material.

Size 40 requires 4½ yards 36-inch material.

Use a pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Could Only Bring Disaster

N.R.A. Policy Would Be No Good For Canada

Writing in the New York American, Hearst's famous editor, Arthur Brisbane, shows how President Roosevelt's N.R.A. policies would bring ruin if adopted in a country like Canada. He quotes Sir Robert Hoare, former Chancellor of the Exchequer in Britain, as stating that while the N.R.A. may work in the United States, with its "vast enclosed market," it would be "disastrous for a country like Canada, depending on its export market."

Britain gets sixty per cent. of national income from exports, while the United States gets less than ten per cent.

Canada, of course, is in the same position as Britain. We have no vast enclosed market. Our wheat, or new print, the products of our mines, all must be sold abroad or not sold at all. Consequently a policy designed to heighten cost of production and with it export prices could only be disastrous.

Instead of more work and wages, there would be no work and wages. We should simply put up the shutters. —Ottawa Journal.

Makes No Mistakes

Scientist Has Invented Machine With A Foolproof Name

Meet the psychotechnologist, a manometer, the world's latest tongue-twister which is another name for a "love detector."

Dr. Alexander Cannon, author and scientist, of London, claims the machine is foolproof. It is not, he declares that not only does it measure the subtlest reaction of human beings to various foods and beverages, but will detect in the fraction of a second the slightest lies, even if the person does not speak.

Said Dr. Cannon in announcing his invention: "The instrument shows a definite and unmistakable reaction when people are in love. The mention of a man or woman's name to the person being tested will set the graph working immediately."

Market For Wheat

Opportunity To Sell Canadian Wheat Exists In China And Japan

Increased markets for Canadian wheat exist in Japan and China, John M. Imrie, managing director of the Edmonton Journal, told the Women's Canadian Club at Toronto. In order to benefit western Canada, he said, there must be fullest co-operation in carrying out the London wheat agreements; willingness to extend concessions to the east for markets for Canadian wheat; reformation of western agriculture to develop diversified farming; stimulation of production; creation of price stabilization boards for domestic food products; extension of intermediate agricultural credits and formation of farm products marketing commission.

White

Bob Marqua, a farmer near Abernethy, Texas, need pay no electric bill. He is a budding electrician and has installed on his farm house roof a wind motor which operates a generator which charges a radio battery which ignites an automobile light bulb. The battery gives him only one light but Marqua never did use more than one coal oil lamp, so he is completely satisfied with his electrical system.

No Mercury Production

There has been no reported production of the mercury in Canada since 1897. Previous to this a small output of quicksilver was recorded as having been produced in British Columbia.

From a property situated on the north shore of Kamloops Lake. The principal mercury producing countries are Italy, Spain, United States, Mexico and Czech-Slovakia.

All types of men are training for the taxi drivers' examinations at the Central Knowledge of London School of Motoring. English Humber, the smart new taxicabs are being put on the streets and proprietors are looking for drivers to match the cars. Over 8,000 London taxi drivers have been passed from the school since 1919. It is estimated that in a four-and-a-half mile radius of Charing Cross, London, there are 4,200 miles of streets, so the student's task is by no means an easy one. Our picture shows one of the classes in progress with the teacher explaining some intricate traffic regulation to the heart of the British capital.

Operates From Light Socket

They X-Ray Capable Of Photographing Entire Body

The smallest X-ray built in this country was demonstrated for the first time to the American Congress of Radiology, at their recent convention in Chicago. Radiologists from all over this country and abroad attended.

The small unit is rated at 58,000 volts and ten milliamperes, and stands in marked contrast to the mammoth 800,000-volt X-ray tube recently installed for cancer treatment at Mercy Hospital, Chicago. The new device operates from an ordinary light socket, is shock-proof, and may be operated in perfect safety by any layman—a combination of virtues long sought by the X-ray industry.

The small set is capable of making X-ray photographs of the entire human body, or it may be carried around and used for making fluoroscopic examinations in industrial plants. It can be used in customs houses to examine clothing, baggage or packages, at race tracks and stables for the inspection of horses' ankles, in cat and dog hospitals, or much work as fluoroscopic examination of aeroplane parts.

The baby X-ray can be used with perfect safety by the average man. It is of particular use in the examination of suspicious packages, it was stated.

Jewish Soldiers Honored

Bulgaria Unveils Monument To Men Lost In Great War

A monument to the unknown Jewish soldier, dedicated to all Bulgarian members of that race who laid down their lives in the Balkan wars and the world war, has just been unveiled at Sofia, the ceremony being attended by both Jews and Christians.

Speeches explaining the valor of Bulgarian Jews in fighting for their Christian king were made by Gen. Vateff and Col. Tadjler, who recalled that of 5,000 Jews mobilized before the armistice, 500 were killed in action.

The Bulgarian Jew has always been conspicuous for his bravery, and the Bulgarian Maccabees are said to have given the martyr "turnout" at the International Jewish Congress recently held in Jerusalem.

No Simple Test

Varities Of Mushrooms Determined Only By Careful Study

H. T. Dunsen, Dominion botanist, says in a letter to The Ottawa Journal that there is no simple test to determine which are good mushrooms, and that many of the tests commonly used are survival of the dark ages. "They peel very easily," they have such a good odor; "I boiled some, and put with them a silver coin, and it did not turn black," may be true statements but they decide nothing concerning edibility." Only by careful and detailed study can a collector know which varietal to avoid. —Toronto Star.

Interest Is Quickened In Trans-Atlantic Air Travel By Survey Of Northern Route

Paying In Cash

Credit Unwisely Used Has蒙aded Ruins For Many

\$10, and under, cash: over about twelve months' credit on approved protest notes." For fifty years these lines appeared at the bottom of advertisements of sale of farm stock, implements, etc. They are not seen any more. In their places are the two words "terms cash." Rarely now is credit asked for at sales, nor rarely is it given to persons buying stock or implements at auctions. In other days a year's credit induced persons to buy more than they could hope to pay for in the time given. Money came due farmers needed the money and pressed for payment. The maker and the endorser were required to secure an extension of time at the bank or elsewhere. Additional costs were incurred, and too often became involved to an extent they had not contemplated, and carrying a load under which they had eventually given up. Credit was used in other ways, to the detriment of the farmer and the thrifty; employed thoughtlessly has placed many a man on the verge of ruin. If out of the present conditions men and women learn to refrain from buying that which they cannot pay for at the time, they will follow the example of every department of life. "Terms cash" are words that should appear at the bottom of sales of all kinds of merchandise, as well as at those of farm stock and implements. What a happy place would Canada be today if we all learned to "pay as we go" when times were good.—Amherstburg Echo.

Experiment A Success

Potatoes Grown From Seed In Russia's Latest Discovery

A revolution in the technique of raising potatoes is promised by Soviet agricultural experts. After a series of experiments conducted in the past two years, it is announced that potato seeds have been found which can be sowed instead of the potato itself. The discovery, credited to agronomists in the Ukraine, will mean an enormous saving in potatoes. Thus, if the method is applied throughout the Soviet Union, 9,000,000 bushels of potatoes would be saved.

The experiments were made with the berries which appear on the potato plant when it is in flower. Each of these berries contain about 300 seeds. By sowing these seeds in Orskanenko, the agronomist who discovered the method, obtained four tons of potatoes from an acre of land, and the quality of the potatoes was higher than where the potatoes had been raised in the normal manner.

By sowing these seeds in Orskanenko, the agronomist who discovered the method, obtained four tons of potatoes from an acre of land, and the quality of the potatoes was higher than where the potatoes had been raised in the normal manner.

Interest in the future of trans-Atlantic travel has been quickened markedly by the survey flight of Colonel Charles A. Lindbergh over the Greenland route.

London dispatches give assurance that expert advisers of Canada and the Motherland are not lagging at a snail's pace for forecasts and vigorous initiative. Announcement of one new project after another testifies to the interest in all the large powers in the mapping of the world's airways. According to the London reports, agreement was reached at the Anglo-Canadian air conference in St. John's, Newfoundland, that Harbor Grace shall be the Atlantic Coast terminus for overseas flights. Harbor Grace, it would appear, is to become the "forks of the road," one route running from there to New York, while the other, via Montreal, will serve Canada.

Although the Lindbergh survey was undertaken largely to survey land routes, the decision of the Anglo-Canadian authorities is said to favor direct overland routes between Newfoundland and Ireland, without touching foreign soil. Stops in Greenland would of course, involve the co-operation of the British government.

The reported plans for the all-British route seems to be in consonance with the general trend of developments in the matter of aircraft communication. The Pan-American Airways, which Colonel Lindbergh represented, is said to maintain a regular service between New York and London, a range sufficient to span the Atlantic.—Toronto Globe.

Working For Peace

British Foreign Secretary Tells About Nation's All-Round Policy

Sir John Simon, British Foreign Secretary, told the House of Commons the other day that Britain's all-round foreign policy possessed qualities that would contribute mightily to a peaceful solution of current problems. "We have tried to conduct our affairs," he said, "on a basis that we mean to maintain as long as we are concerned, on friendly relations with all the world. We mean to make no select or special alliance which is bound in its turn to promote some counter combination. We mean everywhere to support all policies and all movements in all countries that are honestly aiming at the restoration of that thing, impalpable in itself, but so necessary for the recovery of commerce—credit and confidence."

Bicycle Grows In Favor

Figures For September Show Big Increase In Sales In Imports

Certitude that the bicycle was coming into its own again is shown by the importations. Although September is reckoned to be late in the year for a great sale of wheels, the country actually imported 515 bicycles compared with 32 a year ago. As usual the greater number came from the United States; there were 499 British and 16 from the United States. Contrary to experience 32 motor cycles came from the United States. Usually the majority of these imports are British. However in the case of motor cycles also there were more imported than a year ago.—Dominion Bureau of Statistics.

Wreath Was Forgotten

Ceremony To Honor Noddy-Blepe Navigator Was Spoiled

An international ceremony was called off at Montreal because the participants forgot to bring along flowers.

A party of distinguished guests from France and Montreal gathered near the city hall to pay tribute to Vanquelin, noted Dieppe navigator of the 18th century, and to place a wreath on his monument. Greengrass were exchanged. Speeches were made. And then the ceremony was called off. Somebody, it was explained, forgot to bring the wreath.

Excuse Was Worn Out

Gus Mancuso, New York G.A.T. catcher, is credited with one of the best wear cracks of the recent World series.

In the final game of the series at Washington the teams went into the ninth with both sides tied. Mancuso, who might still be playing when the moon came over the mountain, Mancuso walked up to Lacy, the Cubs' catcher, and said, "Gee, I don't know what I can tell the little woman. She's not falling for this over-time gag any more."

"A Modern Service at a Moderate Price"

TOWN & COUNTY Personalography

Local stores are beginning to take on their Christmas appearance, and, rightly so. It's only three weeks till Christmas. Do your shopping early.

Mrs. Jas. Smith was a Calgary visitor on Thursday last.

"The Plough Boy" a local talent play, will be put on in the hall tomorrow night. Don't miss it!

Mr. and Mrs. Daniel of De Winton were here for the old times celebration, and, incidentally spent a few days talking with Mrs. Daniel's brother-in-law and sister, Mr. and Mrs. Geo. Rudnick.

Miss Winifred Poxon, Calgary, came home for the Old Times dance.

Mr. and Mrs. Daniel of Drumheller were Carbon visitors last Thursday.

Mr. and Mrs. J. T. McDonald, and Mrs. Graves, of Calgary, were out for the bonnet and dance last Thursday. Mr. McDonald gave a very interesting address on the life of Father Laumie during the evening's program.

Miss Irene Nash was in Calgary on Sunday.

Joe Planchard was renewing acquaintance in town on Thursday and attended the banquet and dance.

Read about the Christmas advertisements in this issue, and also acceptably: Spend your money in Carbon—where you earn it.

A general meeting of the Carbon Old Times' Association will be held in the Farmers' Exchange hall on Saturday, December 9th, at 3 p.m. Election of officers and other business will be dealt with.

Mr. Ritchie, principal of the Carbon school, has been ill. His week and as a result the local high school students enjoyed a little holiday.

is Yours
A SKIN THAT
CAPTIVATES MEN?

Just for curiosity's sake, try a drop of your complexion. Are you surprised at what you see?

Is there a tendency towards flaking? A line or wrinkle here and there? A suggestion of dryness—can you resist it?

Don't dodge these questions! It's important that you know the truth, if you expect your skin to be attractive to others.

Begin at once to correct these complexion faults. Outcrown Gels Give Oil Free Powder will help you. This luxurious powder feeds into dry times the delicate, radiating skin which your skin needs to remain soft, smooth and supple. With just a few applications, you can see your complexion advance to new youth and loveliness.

You cannot buy a better powder than Outcrown Gels are in price. The Good Housekeeping "Seal of Approval" is your guarantee of quality.

Outcrown Gels Give Oil Free Powder and other Oil Free Products are sold by leading drug, department and chain stores in a wide area. By the way, \$1.00. If you want a sample box of the most popular Outcrown Gels give Oil Free Products, mail the coupon below.

Public school inspector McLean was in the Carbon district last week looking over the state of learning.

Born, to Mr. and Mrs. Art Hudson, on Sunday, Nov. 15th, a son.

Bible school of the First German Baptist church, President, which started on Nov. 4th, will close on Dec. 1st. In the evening of that date the final program will be given in the church at 7:30 p.m. Everyone is invited to attend.

This school will re-open on January 1, 1934 and will continue for a month. Anyone anticipating coming to this school should make application as soon as possible. It is open to all, and no charge to make. Rev. Hesterman will be the teacher.

Don't forget the play "The Eighth Door" which will be presented tomorrow evening (Friday) in the Farmers' Exchange hall, Carbon. This play is being put on by local talent under the auspices of the Carbon LODGE and should prove to be a great attraction.

Ice making is under way at the Carbon curling and skating rink. Frost nights and dull days are responsible for the cooler weather, although there is no snow. Rain fell on three different occasions last week, but showers were light.

Sellsman—Madam, this fine extensibilizer is guaranteed to give you at least fifty years' service.

Elderly Lady—But I can't be here all that time.

Sellsman (misunderstanding her meaning)—Oh, but you can take it with you when you go.

CARD OF THANKS

The Debt of York Chapter LODGE wish to take this opportunity to thank the Elks of Carbon for the stage seats, blankets—Oh, but you can take it with you when you go.

NINA EVANS, acting secretary

ALBERTA'S OPPORTUNITY

IN THE

British Bacon Market

For the first time in history the World's Greatest Bacon Market has granted a definite quota to Canadian Bacon Producers, under controlled imports to assure a steady market. Canada's quota is 250,000,000 lbs. annually.

THE KEY TO THIS MARKET IS QUALITY

Alberta was second in 1932 among all provinces in total hog marketings, but only eight hogs in every 100 marketed were suitable for the British trade.

NOT MORE HOGS, BUT BETTER HOGS

What is needed is not greater numbers, but greater proportion of the Select Bacon Type required by the British Market.

Policies to Encourage Production of High Quality Bacon Here. Since the first of November, have been adopted by the Alberta Department of Agriculture in co-operation with the Federal Government, Bankers and Packers. These include: (a) housing and exchange of off-sets; (b) the farmers for selected gifts from the packing plants.

PAUL'S SERVICE STATION

Once a year the newshy of a certain district in London are taken for an outing on the Thames by a gentleman of the neighborhood, where they can bask in their hearts content. As one little boy was getting into the water, a friend observed: "I say, Bill, ain't you dirty?" "Yes," replied Bill. "I missed the train last year."

CARBON TRADING CO.

A Foundation for Goodwill

There is a very solid foundation for the goodwill that prevails towards United Grain Growers wherever the sign of this company appears on an elevator throughout western Canada.

It rests on many years of useful service and a long demonstration that this company not only desires to take care of the interests of its former customer, but it has the organization, the equipment, the resources and the experience which enable it to do so.

Whether in selling grain or in buying farm supplies it is sound business to deal with this Company.
